Browser 1 — Form

User Registration Form

Enter The Details Below

First Name : pankaj   Last Name : sharma

Email ID : pankajsharma@gmail.com   DoB : 11/17/2020

Password : ••••   confirm Password : ••••

Choose Image : Choose file No file chosen   Gender : fill the gender

Enter Your Hobbiey Here   PLase Write Your Hobbiey here:

click Me

## Browser 2 — localhost/usercon.php

first name is pankaj
Last name is sharma
Gender is male
Mail iD is panlak@gmail.com
pass is qwe
Confirm password qwe
DOB is 2020-11-17
Hobby is criclet ,hockey,coding ,book reading,jumping
image id Screenshot (6).png
pass Matched

data inserted

Q1. Write a php script to create a web form to implement the registration process form must have various input fields (First Name, Last Name, E-mail, Password, Confirm Password, DatOfBirth, Gender, Hobbies, and image).
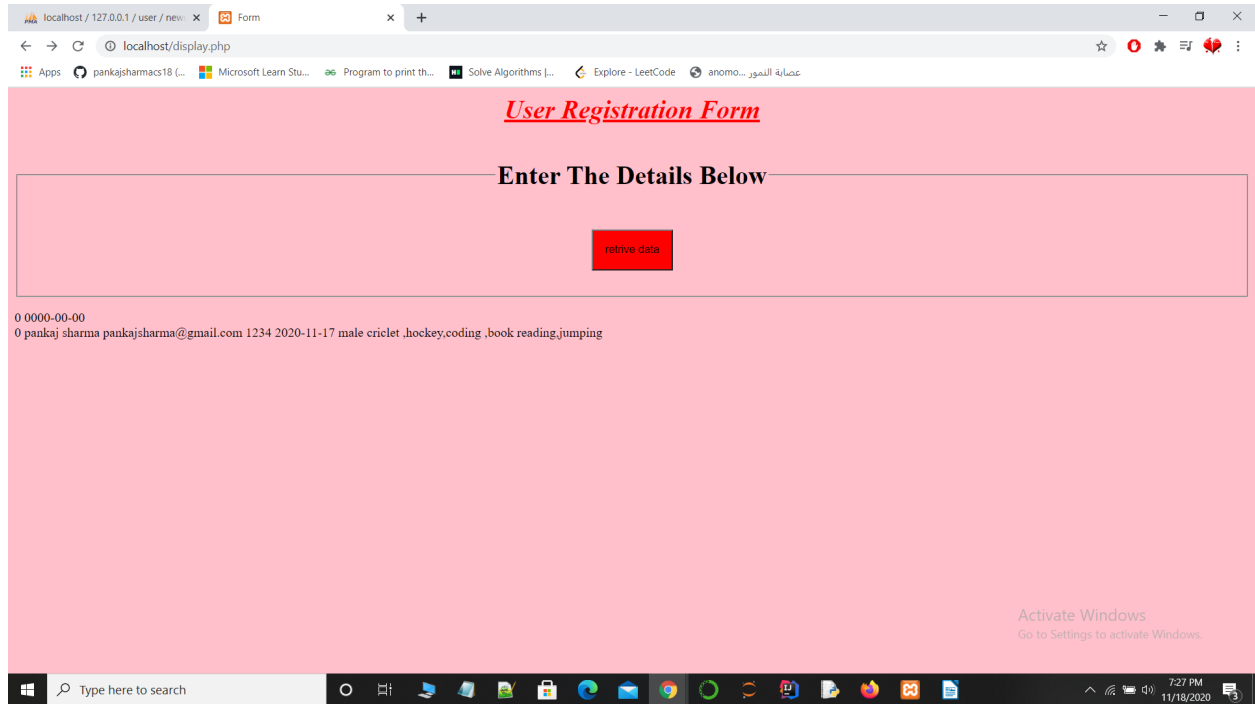

Php file

```php
<?php
  $con=mysqli_connect('localhost','root','');
if(!$con)
{
        echo "Not Connect to server ";
}
if(!mysqli_select_db($con,'user'))
{
        echo "Data not Connected ";
}
$fname=$_POST['fname'];
$lname=$_POST['lname'];
$mail=$_POST['mail'];
$gen=$_POST['gen'];
$pass=$_POST['pass'];
```

```php
$cpass=$_POST['conpass'];
$img=$_POST['img'];
$dob=$_POST['dob'];
$hoby=$_POST['hoby'];
echo "first name is $fname <br>";
echo "Last name is $lname <br>";
echo "Gender is $gen <br>";
echo "Mail iD is $mail <br>";
echo "pass is $pass <br>";
echo "Confirm password $cpass <br>";
echo " DOB is $dob <br>";
echo " Hobby is  $hoby <br>";
echo "image id $img ";
if($pass==$cpass)
{
        echo "<br>pass Matched <br>";
         $sql="INSERT INTO userinfo(First Name, Last Name,Email, PassWord,Confirm
PassWord,DOB,Gender,Hobbiey,Image) VALUES
('$fname','$lname','$mail','$pass','$cpass','$dob','$gen','$hoby','$img')";
                if(!mysqli_query($con,$sql))
                {
                        echo "<br>data Not inserted ";
                }
                else
                {
                        echo "Inserted ";
                }

}
else
{
        echo "Pass Word Mismatch ";

}
header("refresh:3; url=form.html")
?>
```

Q2. Create another button/submit button over the form which is used to retrieve the data from the database table.

```
<html>
<head>
<title > Form </title>
</head>
<body bgcolor="pink">

<h1 align="Center" style="color:Red"> <b><u><i> User Registration Form </i></u></b></h1>
<form method="post" action="usercon.php">

<fieldset align="center">

        <legend><h1>Enter The Details Below</h1> </legend>
                <label>First Name :</label><input type="text" name="fname" placeholder="First
Name Here">
                <label> Last Name :</label><input type="text" name="lname" placeholder="Last
Name Here ">
                <br>
          <br>
        <label> Email ID : </label><input type="email" name="mail"
placeholder="ex:hello@yahoo.com">
        <label> DoB : </label> <input type="date" name="dob" placeholder="Choose Here Date"
>

         <br><br>
        <label>Password :</label><input type="Password" name="pass"
placeholder="Password here">
```

```
        <label>confirm Password :</label><input type="Password" name="conpass"
placeholder="Password here">
                <br><br>

        <label for="img"> Choose Image : <label> <input type="file" name="img" placeholder="
Image here " >
        <label> Gender : </label> <input type="text" type="gen" placeholder="fill the gender">
        <br>
        <br>
        <label> Enter Your Hobbiey Here</label> <input type="textarea" name="hoby"
placeholder ="PLase Write Your Hobbiey here:" style="width:400px; height:50px">
        <br>

         <h1 align="center" > <input type="submit" name="submit" value="click Me"
style="width:100px; height:50px"></h1>
</fieldset>

</form>
</body>
</html>
```

Q3. Write a PHP script code to delete a particular row from the database entries by writing the queries over a button click.

```
<html>
<head>
<title > Form </title>
</head>
<body bgcolor="pink">

<h1 align="Center" style="color:Red"> <b><u><i> User Registration Form </i></u></b></h1>
<form method="post" action="dis.php">

<fieldset align="center">

        <legend><h1>Enter The Details Below</h1> </legend>

         <h1 align="center" > <input type="submit" name="submit" value="retrive data"
style="width:100px; height:50px; background-color:Red"></h1>
</fieldset>
</form>

<?php
$con=mysqli_connect('localhost','root','');
 if(!$con)
 {
         echo "Not Connect to server ";
 }
 if(!mysqli_select_db($con,'user'))
 {{
         echo "Data not Connected ";
 }}
$sql="SELECT id,fname,lname,mail,passWord,DOB,Gender,Hobbiey FROM newuser";
$res=mysqli_query($con,$sql);
 if(mysqli_num_rows($res)>0)
 {
 while($row=mysqli_fetch_assoc($res))
 {
 echo $row['id']." ".$row['fname']." ".$row['lname']." ".$row['mail']." ".$row['passWord']."
".$row['DOB']." ".$row['Gender']." ".$row['Hobbiey']."<br>";
 }
 }
?>

</body>
</html>

<html>
```
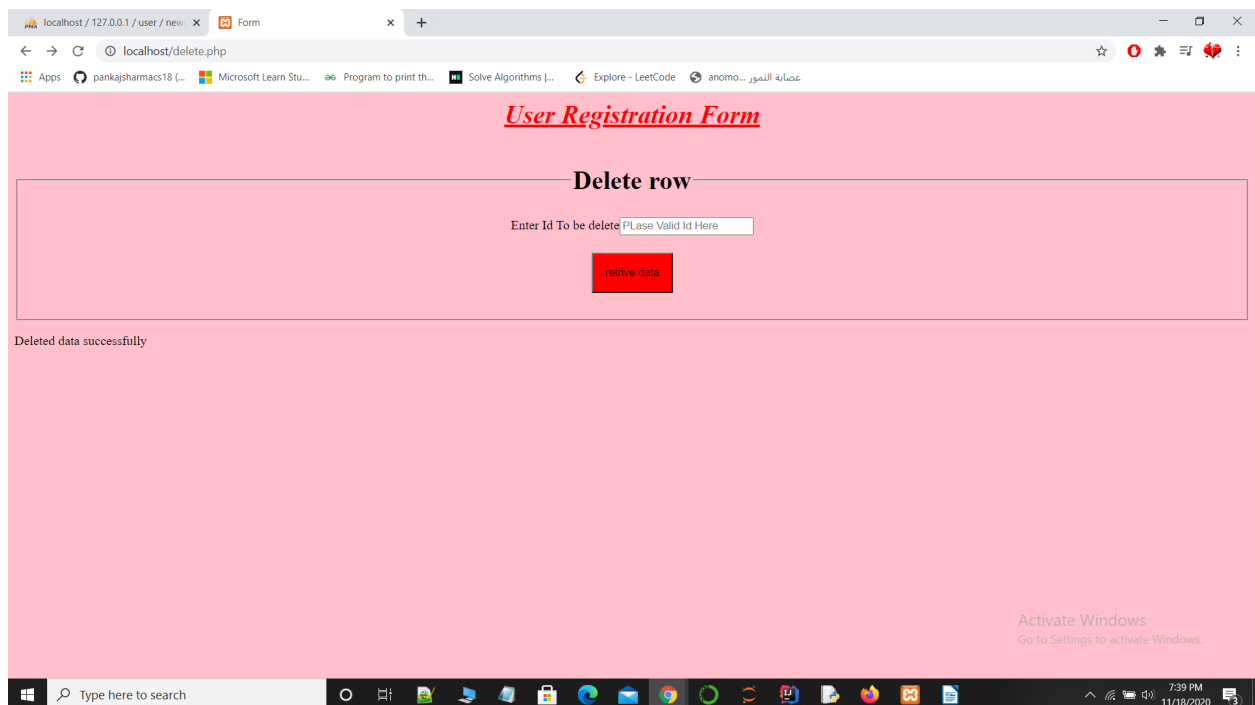

```
<head>
<title > Form </title>
</head>
<body bgcolor="pink">

<h1 align="Center" style="color:Red"> <b><u><i> User Registration Form </i></u></b></h1>
<form method="post" action="dis.php">

<fieldset align="center">

        <legend><h1>Delete row </h1> </legend>
        <label> Enter Id To be delete</label><input type="number" name="id"
placeholder="PLase Valid Id Here"><br>
         <h1 align="center" > <input type="submit" name="submit" value="retrive data"
style="width:100px; height:50px; background-color:Red"></h1>
</fieldset>
</form>

<?php
$con=mysqli_connect('localhost','root','');
 if(!$con)
 {
        echo "Not Connect to server ";
 }
 if(!mysqli_select_db($con,'user'))
 {{
        echo "Data not Connected ";
 }}

 $sql = "DELETE FROM newuser WHERE id=0";

   $res = mysqli_query($con, $sql);

  if(! $res ) {
    die('Could not delete data: ' . mysqli_error());
  }
  echo "Deleted data successfully\n";

?>

</body>
</html>
```
